Under the Sea

A Game by Q&A

Venus has a beautiful name and is the second planet from the Sun. It's terribly hot—even hotter than Mercury—and its atmosphere is extremely poisonous. It's the second-brightest natural object in the night sky after the Moon

WHAT IS THIS TOPIC ABOUT?

Here you could give a brief description of the matter you want to talk about. For example, if you want to talk about Mercury, you could say that it's the closest planet to the Sun and the smallest one in the Solar System. It's only a bit larger than our Moon, and its name has nothing to do with the liquid metal, since it was named after the Roman messenger god, Mercury

DEFINITION OF CONCEPTS

MERCURY

Mercury is the closest planet to the Sun and the smallest one in our Solar System

SATURN

Yes, this is the ringed one. It's a gas giant, composed mostly of hydrogen and helium

MARS

Despite being red, Mars is a cold place, not hot. It's full of iron oxide dust

VENUS

Venus has a beautiful name and is the second planet from the Sun

FEATURES OF THE TOPIC

of Earth's surface is water-covered

344,000 km²

is the area covered by the Great Barrier Reef

33,000

different species of fish have been described so far

PRACTICAL USES OF THIS SUBJECT

MERCURY

Mercury is the closest planet to the Sun and the smallest one in the Solar System. It's only a bit larger than our Moon

JUPITER

It's the biggest planet in our Solar System and also the fourth-brightest object in the night sky

VENUS

Venus has a beautiful name and is the second planet from the Sun. It's terribly hot, even hotter than Mercury

Despite being red, Mars is a cold place, not hot. It's full of iron oxide dust, which gives the planet its reddish cast

CASE STUDY

Insert your multimedia content here

DID YOU KNOW THIS?

Mercury is the closest planet to the Sun and the smallest one in the Solar System Despite being red, Mars is a cold place, not hot. It's full of iron oxide dust

Venus has a beautiful name, but it's terribly hot, even hotter than Mercury

PROBLEM

Venus has a beautiful name and is the second planet from the Sun

SOLUTION

Despite being red, Mars is a cold place, not hot. It's full of iron oxide dust

OVERVIEW DIAGRAM

Mercury is the closest planet to the Sun and the smallest one in the Solar System

Saturn is the ringed one. It's a gas giant, composed mostly of hydrogen and helium

EXERCISE

What is the largest animal found in water?

- B. The colossal squid
- C. The whale shark

Hint: It's a mammal and can weigh more than 150 tonnes!
